

Deep Learning Engineer – Student Worker or Intern (m/f/d)

RIIICO · Starting as soon as possible · Düsseldorf or Aachen

We are RIIICO, an RWTH-supported arising startup. We develop an innovative product backed by artificial intelligence for analyzing 3d scans and fully automatic object detection. Our aim is to revolutionize the planning workflow in various industries with a ton of fascinating use-cases and want YOU to extend our team.

Your Tasks

- You actively contribute to the research efforts for our rapid product development
- You are responsible for the architecture, training, evaluation and advancement of our neural networks
- You do research in state-of-the-art 3D object detection
- You work with 3D pointclouds of our customers and in diverse customer projects
- You integrate and roll-out our AI in innovative products

Your Skills

- You can cope with an immensely dynamic environment well and can solve new problems quickly
- You have a structured workflow and are capable of working independently
- You are enrolled in a technical or scientific study program (B.Sc. / M.Sc.)
- You have at least one year of experience in coding Python or C++
- You are knowledgeable in Deep Learning and frameworks like PyTorch or TensorFlow
- You speak English fluently

What We Offer

- A highly motivated team of technology-oriented RWTH graduates
- Personal insights into the development process of a modern deep-tech startup
- A pleasant workplace in our wonderful startup offices
- Flexible working times and an appealing salary
- Joyful team activities

Your Non-Plus Ultra

- You have already participated in Kaggle challenges or have written a final or project thesis with machine learning
- You have experience with CUDA C++ code

Contact

We are looking forward to your application.
