Data Operations – Intern Full-Time (m/f/d)

RIIICO · Starting as soon as possible · Düsseldorf or Aachen

We are RIIICO, an RWTH-supported arising startup. We develop an innovative product backed by artificial intelligence for analyzing 3d scans and fully automatic object detection.
Our aim is to revolutionize the planning workflow in various industries with a ton of fascinating use-cases and want YOU to extend our team.

Your Tasks

· You are responsible for bringing our customers' digital twins to life, from raw data processing to final deployment

· You push our cutting-edge product ready for prime time with the customer's 3D data

· You employ our AI and data pipeline to solve user problems quickly

· You work together with our Deep Learning team on data quality and AI improvements

· You envision and discover product features in close cooperation with our product team

What We Offer

· A highly motivated team of technology-oriented RWTH graduates

· Personal learning opportunities in the operations team of a modern deep-tech startup

· A pleasant workplace in our wonderful offices in Düsseldorf & Aachen

· Flexible working times and an appealing salary

· Joyful team activities

Your Skills

· You can cope with an immensely dynamic environment well and quickly adapt to changes in requirements and newly introduced workflows

· You are comfortable working in Linux environments and have basic knowledge of Bash & Python

· You work well on challenges with large amounts of data and don't shy away from manual and semi-automated work

· You have a structured workflow and are capable of working independently, as well as coordinating effectively with your team collegues

· You speak English fluently

Your Non-Plus Ultra

· You have experience in coding Python scripts

· You have already worked on 3D pointclouds and/or meshes

· You love visual data & are enthusiastic about computer vision
